

Welcome to The Eye Center,

Thank you for choosing our medical practice for your eye care needs.

Please print and complete forms and bring them with you to your appointment. Also, we ask that you bring a valid driver's license, a medication list, and all insurance cards with you to your appointment.

Please note that The Eye Center does not participate in all insurance plans. Prior to your appointment, please check with your insurance company to determine whether our physicians are participants of your plan. For nonparticipating plans, we request that payment be made in full at the time of service. If your insurance requires a referral, it is your responsibility to get the referral before making an appointment with our office. If you do not obtain a referral, your visit will not be covered and you will be required to pay in full or your appointment will be rescheduled. At the time of your appointment, you are responsible to pay your copay, deductible, and any uncovered services.

REFRACTION: A refraction test tells your eye doctor exactly what prescription you need in your glasses. Contact lens services and refraction test are usually not covered by insurance. You will be asked to pay for these services at the time of your visit.

Please plan for 2-3 HOURS for your appointment. Comprehensive medical eye exams could take 2-3 hours and include a history work-up and preliminary exam by a technician, dilation of the pupils, and an exam by a physician.

Some side effects of pupil dilation are ability to focus and light sensitivity. If you have dark sun glasses, please bring them with you. Dark disposable glasses are available if needed. You may want to bring someone with you to drive you home after your visit.

Children under the age of nineteen must be accompanied by a parent or guardian during each office visit.

Please do not hesitate to contact our office with questions or concerns prior to your appointment.

We look forward to seeing you soon!
